

### The Big Picture Rubric

Weight	Task	Best	Good	Needs improvement
20%	Describe homeostasis and provide examples.	I explained what homeostasis is and gave examples for all 3 body systems.	I explained what homeostasis is and gave examples for 1 or 2 body systems.	I explained what homeostasis is, but I did not provide examples.
15%	Indicate the overall function of the circulatory and respiratory systems.	I described the overall function of both systems.	I described the overall function of 1 system.	I did not describe the function of the systems.
15%	Show the functions of the parts of the circulatory system.	I showed all the parts of the circulatory system and their relationship to other parts.	I showed all the parts of the circulatory system, but some relationships between parts may be missing.	I showed some of the parts of the circulatory system, but some may be missing.
15%	Show the functions of the parts of the respiratory system.	I showed all the parts of the respiratory system and their relationship to other parts.	I showed all the parts of the respiratory system, but some relationships between parts may be missing.	I showed some of the parts of the respiratory system, but some may be missing.
20%	Show relationships between the body systems and concepts.	I showed several appropriate links between the body systems and concepts.	I showed a few appropriate links between the body systems and concepts.	I showed links between the body systems and concepts, but the relationship was not clear.
15%	Share responsibility.	I worked well with my partner to create our concept map framework.	I worked with my partner to create our concept map framework, but we had some problems.	I did not work with my partner to create our concept map framework.
