Wind and water can change the shape of the land. (2-ESS2-1)

Maps show where things are located. One can map the shapes and kinds of land and water in any area. (2-ESS2-2)

Water is found in the ocean, rivers, lakes, and ponds. Water exists as solid ice and in liquid form. (2-ESS2-3)

Because there is always more than one possible solution to a problem, it is useful to compare and test designs. (2-ESS2-1)

Develop a model to represent patterns in the natural world. (2-ESS2-2)

Obtain information using various texts, text features (e.g., headings, tables of contents, glossaries, electronic menus, icons), and other media that will be useful in answering a scientific question. (2-ESS2-3)

Patterns in the natural world can be observed. (2-ESS2-2), (2-ESS2-3)

Things may change slowly or rapidly. (2-ESS2-1)
